This book is intended as an introductory text for
students studying a wide range of courses
concerned with animal management, zoo
biology and wildlife conservation, and should
also be useful to zookeepers and other zoo
professionals. It is divided into three parts. Part 1
considers the function of zoos, their history, how
zoos are managed, ethics, zoo legislation and

wildlife conservation law. Part 2 discusses the design of zoos and zoo exhibits, animal nutrition, reproduction, animal behaviour (including enrichment and training), animal welfare, veterinary care, animal handling and transportation. Finally, Part 3 discusses captive breeding programmes, genetics, population biology, record keeping, and the educational role of zoos, including a consideration of visitor behaviour. It concludes with a discussion of the role of zoos in the conservation of species in the wild and in species reintroductions. This book takes an international perspective and includes a wide range of examples of the operation of zoos and breeding programmes particularly in the UK, Europe, North America and Australasia. A Guidebook to the Hunterian Art Gallery of the University of Glasgow E C W Press

The central theme of this book is concerned with the controversies on technique between Anna Freud and Melanie Klein in the 1920s and 1930s, and with a clear differentiation between child analysis proper and analytical child psychotherapy. Alex Holder takes into account the historic background in which child psychoanalysis developed, especially World War II and the Nazi regime in Germany. The author also looks at the way child psychoanalysis developed in specific institutions, such as the Hampstead Child Therapy

Course in London, and in specific areas, such as the spread of child analysis in the US. The concluding chapter is on the importance of knowledge of child analysis among psychoanalysts working with adults. The differences in the theories of the two "greats" in child analysis, Anna Freud and Melanie Klein, are examined one by one, including such concepts as the role of transference, the Oedipus complex and the superego.

American Pickers Guide to Picking "O'Reilly Media, Inc."

This book guides medicinal chemists in how to implement early ADMET testing in their workflow in order to improve both the speed and efficiency of their efforts. Although many pharmaceutical companies have dedicated groups directly interfacing with drug discovery, the scientific principles and strategies are practiced in a variety of different ways. This book answers the need to regularize the drug discovery interface; it defines and reviews the

field of ADME for medicinal chemists. In addition, the scientific principles and the tools utilized by ADME scientists in a discovery setting, as applied to medicinal chemistry and structure modification to improve drug-like properties of drug candidates, are examined.

A true adventure story and the go-to guide for "picking" American treasures from anyone's backyard, straight from the stars of History's American Pickers In these pages, professional treasure hunters Mike Wolfe and

Frank Fritz chronicle their road trips across the American countryside in search of "rusty gold" to buy and sell among the picking world's one-of-a-kind characters. Whether you are a fan of the show or just like finding hidden riches, you will love seeing what Wolfe and Fritz dig up and enjoy meeting the devoted collectors, extreme stockpilers, and elite dealers who they encounter along the way. Wolfe and Fritz do not deal in fine antiques. Their secondhand treasures are of the down-and-dirty and sometimes even bizarre variety, from old bicycles and vintage tools, to sun-bleached cars and handmade furniture, retired carnival games and unusual taxidermy. Assisted by Danielle Colby, who helps out at Antique Archaeology, Wolfe and Fritz buy on the cheap and then sell to dealers, art directors, interior designers, or anyone looking for a little bit of authentic Americana. The three now share their secrets to finding hidden gems, offering helpful hints that will show what average Americans can do to find the treasures that await them. From American Pickers Guide to Picking: Junk is Beautiful When we knock on a door, 90 percent of the time the things we find are junk. But we don't care about the odds; a picker never turns down an opportunity, no matter where it is. We've picked pickup trucks. We've picked flat beds. We've picked dumpsters. We even picked a Mercury Sable. We're looking for the unusual, the impossible, the funky, the

different, the bizarre-things we have never seen before. And we'll go anywhere we have to go to find it. No location is off-limits to a hardcore picker. And there's plenty of things to be found at antique stores, thrift and consignment shops, flea markets, estate sales, and swap meets, and a lot of the tips in this book apply to finding treasures at these joints. But that's not really the kind of picking we do anymore. We look outside the box to find our junk-a word we use almost like a term of endearment: to us: junk is beautiful.

"Russia had fascinated outsiders for centuries, and according to Alicia Chudo, it is high time this borscht stopped. In And Quiet Flows the Vodka, Chudo takes no prisoners as she examines Russia's great tradition of unreadable writers, revolutionaries who can't hit the broadside of a tsar, and Soviets who like their vodka but love their tractors." --Book Jacket.

During the 1970s and 1980s, Peter Matthiessen took part in a number of expeditions to Africa, witnessing first-hand the continent's many and diverse peoples and wildlife. The fruits of these journeys are three of the most impressive essays on the natural world of the late twentieth century. *The Tree where Man Was Born* documents wild landscapes, peoples and animals, observed in a series of journeys in East

Africa, from the Sudan, south through Uganda, Kenya and Tanzania, exploring the Serengeti, the Maasai Mara, the Ngorongoro crater and the archaeological sites of the Rift Valley. *African Silences* recounts two expeditions made to West and Central Africa, including Zaire (as it then was), Gabon and the Central African Republic. *Sand Rivers* describes the Selous game reserve in Southern Tanzania, one of the largest, but least-known refuges for animals left on earth, and provides an unforgettable portrait of this area and the fierce, lonely men who created it. These three classic works represent Matthiessen the naturalist at his finest; written with an all-encompassing curiosity and knowledge that brings alive the people, places and wildlife he encounters, and updated with a new introduction by the author.
